Summary

Software Engineer at Paytm with 1+ years of experience building scalable backend systems for payment reconciliation using Java, Spring Boot, SQL, Redis, and AWS. Experienced in designing end-to-end reconciliation platforms processing 200K+ financial transactions.

Education

National Institute of Technology Kurukshetra

2021–2025

Bachelor of Technology (B.Tech.) in Information Technology, CGPA: 7.95

Kurukshetra, Haryana

BSEB Board

2017–2019

Class XII (Mathematics), 73.6%

Gopalganj, Bihar

Experience

Paytm

Jun 2025 – Present

Software Engineer

Backend

- Architected an end-to-end Chargeback Reconciliation System with Product, Finance, Backend, and Frontend teams.
- Led the complete software lifecycle from design to production support, ensuring reliable daily reconciliation.
- Automated reconciliation across 4 data sources for daily files from 10+ banking partners.
- Engineered duplicate chargeback detection and merchant recovery workflows, reducing manual reconciliation effort for the Finance team by **80%**.
- Built scalable backend services processing approximately **200K financial transactions** using Java, Spring Boot, SQL, Redis, and AWS.
- Delivered 15+ finance reports and dashboards supporting reconciliation and settlement.

Paytm

Jan 2025 – Jun 2025

Software Development Engineer Intern

Backend

- Resolved critical production issues through root-cause analysis, reducing service downtime by over **30%**.
- Contributed backend enhancements to the internal Knockoff project, improving service reliability and maintainability.
- Strengthened production observability using Elasticsearch, OpenSearch, Kibana, and Grafana, reducing issue diagnosis time by **40%**.

Projects

Hospital Management System (MERN)

GitHub

- Built a role-based Hospital Management System using the MERN stack with JWT authentication.
- Designed REST APIs and responsive React dashboards for appointment scheduling and administration.

Personal Portfolio (React, Tailwind CSS)

GitHub — Live

- Developed and deployed a responsive portfolio website using React and Tailwind CSS featuring **5+ projects**, technical skills, resume, and professional experience.

Achievements

- Solved **1300+** DSA problems across LeetCode and GeeksforGeeks.
- Secured **3rd Place** in the GeeksforGeeks Institute Ranking.
- Earned a **4★** CodeChef rating and qualified JEE Advanced.

Technical Skills

Languages: Java, SQL, C/C++, Python, JavaScript

Backend: Spring Boot, REST APIs, Node.js, Express.js

Databases: MySQL, Redis, MongoDB

Cloud: AWS (S3, SQS), Jenkins

Monitoring: Elasticsearch, OpenSearch, Kibana, Grafana

Frontend: React, HTML, CSS, Tailwind CSS

Tools: Git, Postman, IntelliJ IDEA, VS Code

Core CS: DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design
