Summary

Software Engineer at Paytm with 1+ year of experience building scalable backend systems for payment reconciliation and financial reporting. Experienced in Java, Spring Boot, SQL, Redis, AWS, Elasticsearch, and OpenSearch, with expertise in designing end-to-end reconciliation workflows and production-grade backend services.

Education

National Institute of Technology Kurukshetra Bachelor of Technology (B.Tech.) in Information Technology CGPA: 7.95	2021 – 2025 Kurukshetra, Haryana
BSEB Board Class XII (Mathematics), Percentage: 73.6%	2017 – 2019 Gopalganj, Bihar

Experience

Paytm <i>Software Engineer</i>	Jun 2025–Present <i>Backend</i>
- Architected an end-to-end Chargeback Reconciliation System from scratch by collaborating with Product, Backend, and Frontend teams. - Engineered reconciliation workflows processing daily files from 10+ banking partners, automating reconciliation across four heterogeneous data sources. - Automated complex chargeback reconciliation by implementing algorithms for duplicate chargebacks, merchant recoveries, missing transaction identifiers, and bank-specific rules, reducing manual reconciliation effort by 80%. - Delivered 15+ operational and finance reports along with dashboard datasets used daily by Finance and Operations teams. - Developed scalable backend services processing approximately 200K financial transaction records across multiple banking partners using Java, Spring Boot, SQL, Redis, and AWS.	
Paytm <i>Software Development Engineer Intern</i>	Jan 2025–Jun 2025 <i>Backend</i>
- Resolved critical production issues through root-cause analysis, reducing service downtime by over 30%. - Contributed backend features to the internal Knockoff project, improving service reliability. - Optimized production observability using Elasticsearch, OpenSearch, Kibana, and Grafana, reducing 40% diagnosis time.	

Projects

Hospital Management System (MERN)	2024
- Implemented a role-based Hospital Management System using the MERN stack with JWT authentication. - Developed REST APIs and responsive React dashboards for appointment scheduling and administration.	
Personal Portfolio (React, Tailwind CSS)	2023
- Created a responsive personal portfolio using React and Tailwind CSS showcasing projects, technical skills, and experience.	

Achievements

- Solved **1300+** DSA problems across LeetCode and GeeksforGeeks.
- Secured **3rd Place** in GeeksforGeeks Institute Ranking, achieved **4★** on CodeChef, and qualified JEE Advanced.

Technical Skills

Languages: Java, C/C++, Python, JavaScript, SQL
Backend: Spring Boot, REST APIs, Node.js, Express.js
Databases: MySQL, MongoDB, Redis
Cloud/DevOps: AWS S3, AWS SQS, Jenkins
Monitoring: Elasticsearch, OpenSearch, Kibana, Grafana
Frontend: React, HTML, CSS, Tailwind CSS
Tools: Git, Postman, IntelliJ IDEA, VS Code
Core: DSA, OOP, DBMS, OS, CN, System Design
